TECHNICAL DATA SHEET

RWM ELECTRIC CHAIN HOIST WITH ELECTRIC TROLLEY - SINGLE SPEED - 1000KG CAPACITY

MODEL: W-ET-1000

DESCRIPTION

RWM hoists can be considered the Ferrari of hoist brands, and not just because they are engineered and manufactured in Italy by an in-house team.

RWM prides itself on engineering excellence: every hoist is hand-crafted from the highest quality materials. As a result, RWM hoists can safely operate in temperatures as low as -20°C and as high as +50°C – an operating range up to 40% larger than other common hoist brands. This makes RWM the go-to hoist for material handling tasks in harsher environments.

RWM hoists are also the ideal option for demanding industrial applications where uptime is critical. While many hoists have a duty cycle of 40%, RWM hoists have duty cycles as high as 55%.

RWM hoists and the more common economy hoists are different tools designed for various uses. Just as you wouldn't invest in a Ferrari as a run-around vehicle, you wouldn't invest in a RWM hoist if you don't require the additional quality and reliability that comes with a hand-built, European-engineered masterpiece.

Choose RWM as your go-to hoist for more challenging and demanding situations where quality and durability is paramount.

FEATURES

- RWM Electric Chain Hoists are manufactured for Stratalign by RWM, Italy who are ISO 9001:2015 Certified.
- - Machinery Directive (DM) 2006/42/CE
 - Low Voltage Directive (DBT) 2014/35/UE
 - Electromagnetic Compatibility Directive (EMC) 2014/30/UE
- E Design Verified by a NZ registered Chartered Professional Engineer.
- Cylindrical three-phase self-braking motor with an electromagnet, all with class F insulation.
- ➡ The motor brake system is 103V electromechanical spring type.
- Hoist is IP54 rated
- ➡ The load limiter clutch is a device that limits the maximum travel both upward and downward and acts as a limiter for overloads.
- In The epicyclical type gearbox is lubricated with permanent grease. It is built in high resistance steel and subjected to heat treatments, thus guaranteeing a long life. With the recommended lubricants the hoist is able to operate in environments with temperatures between -20 ° C and + 50 ° C.
- ➡ The electrical panels are produced according to the CEI-EN 60204 standard with the traditional wiring system.
- The 24V low voltage transformer allows the hoist to carry out a high number of operations equal to 240 starts / hour.

TECHNICAL DATA SHEET

RWM ELECTRIC CHAIN HOIST WITH ELECTRIC TROLLEY - SINGLE SPEED - 1000KG CAPACITY

MODEL: W-ET-1000

SPECIFICATIONS

| | SPECIFICATIONS | | | | | |
|------------------------------|--|--|--|--|--|--|
| Operating Voltage | 400V / 50Hz / 3Ph | | | | | |
| Load Chain | oad chain according to EN 818-7-DAT/DT | | | | | |
| Pendant Control Cable | 5 metre | | | | | |
| Power Cable | \approx 4.5 metre without plug | | | | | |
| Hoist Protection | IP 54 | | | | | |
| Classification | M5/2m (ISO/FEM) | | | | | |
| Duty cycle / Starts per hour | 40% / 240 | | | | | |
| Insulation Class | F | | | | | |
| Operating Temperature | -20°C - +50°C | | | | | |
| | | | | | | |

| PROTECTION | | | | | | |
|--|--|--|--|--|--|--|
| Control Switch | 24V pendant control switch with emergency stop button. | | | | | |
| Overload Protection Load limiter clutch acts as limiter for overloads. | | | | | | |
| Brake Electromagnetic spring pressure brake, holds the load in the event of power failure. | | | | | | |
| Limit Switch | Electro-mechanical upper and lower limit switch. | | | | | |
| Thermal Protection | Protected through heat sensor. | | | | | |

ELECTRIC HOIST

| MODEL | CAPACITY kg | LIFTING SPEED m/min | LOAD CHAIN Ømm | CHAIN FALLS | POWER OUTPUT kW | NET WEIGHT kg |
